

Healthcare providers recognize POMCO Group as one of the top benefit administrators with responsive provider service, claims payment and plan administration.

EXPERIENCE. EXCELLENCE.

POMCO Group was established in 1978 and built upon the most basic aspect of service – give our clients what they need to make their benefit programs successful. One of the most identifiable signs of program

success is the access employees have to their physicians and the hospitals that serve them.

For over thirty years, POMCO Group has worked to strengthen its network which currently serves over 45,000 providers and facilities.

Our recruiting efforts are continuous and successful due in part to our ever-expanding client list. We currently have over 250,000 covered lives and manage over \$1 billion in funds.

As one of the largest independent benefits administrators in the nation, our success doesn't just stem from the services we provide, its from how we provide those services.

We strive to deliver an excellent experience for our clients and our providers across all aspects of our business.
